Hi Soratha,
Thanks for providing this update.
What is required to demonstrate that the agreement is for less than 10 years?

Derek Porcella

Hi Soratha,

The CEQA NOE was filed in May of 2024. When the CEQA NOE is filed it starts a 30 day clock in which the state will review the project and either accept the exemption or reject the exemption. When an exemption is accepted the exemption remains on file and the project may proceed. An approval document is not issued. If an exemption is challenged/not accepted, the lead agency is contacted and required to file an Initial Study to determine whether an Environmental Impact Report is required, or whether a Negative Declaration can be filed instead.

City of Benicia/Benicia PD did not receive a requirement to file, so the exemption was deemed approved when the clock expired last year.

Regarding NEPA - the State of California is the lead agency for filing NEPA, so that filing would need to be completed by Caltrans, or a California State agency operating on behalf of Caltrans. I've only ever seen this done when Caltrans needs permission from FHWA to issue a permit. I don't believe NEPA is warranted for Benicia PD's project because CA-780 is a state route, not an interstate. I don't believe Caltrans needs FHWA approval to issue a permit for work in Caltrans controlled right of way, but that determination probably needs to come from Caltrans.

Subject: RE: 423899 - Benicia PD - Encroachment Permit Application; 0424-NSV-0053

Hi Luis,

Please see the latest comments from our structural reviewer below and provide the requested information:

The submitted calcs (pages 5 and 10) assumed current Std Plan dimensions. However, it is my opinion that the existing pole is an older type.

TYPE 15 AND TYPE 21
ELEVATION A

TYPE 15 AND TYPE 21 BARRIER RAIL
ELEVATION B

POLE DATA				BASE PLATE DATA				CIDH PILE FOUNDATION	
A	Min OD		WALL THICKNESS	C	BC = BOLT CIRCLE	THICKNESS	ANCHOR BOLT SIZE	Ø1a	DEPTH
HEIGHT	BASE	TOP							
30'-0"	8"	3 1/8"	0.1196"	1'-0"	1'-0"	1 1/2"	1" # x 36" #	2'-6"	6'-0"
35'-0"	8 5/8"	3 3/8"	0.1793"			2"	1 1/4" # x 36" #		7'-0"

BARRIER RAIL BOLTS, SEE STANDARD PLAN ES-6B.

Please provide **As-Built of the existing light pole** (see image below).

There is an aluminum identification tag on the existing pole.

And from that, one can determine:

- Year of the original construction and/or Year of Std Plans, and
- Pole Type.

Please provide the existing pole information and dimension or as-built for further review.

Thanks,

Soratha Sing

Subject: RE: 423899 - Benicia PD - Encroachment Permit Application; 0424-NSV-0053

Hi Erica,

Per the conclusion of the structural analysis you provided, the proposed equipment does not meet the AASHTO code requirement (Upon reviewing the results of this analysis, it is our opinion that the structure does not meet the specified AASHTO code requirement. The equipment mounts are not therefore deemed adequate to support the existing and proposed loading as listed in this report.), Is this written correctly? If so, the proposed system cannot be placed on our pole and the application will be cancelled. Please review the structural analysis and provide us with the changes as necessary.

Thanks,

Hi Soratha,

I have combined what I could into a single PDF for the policy exception and uploaded it to this google drive folder: <https://drive.google.com/drive/folders/1urL34FR0J3VdrXS5Soyco7mnv00Ae8fb?usp=sharing>

The application could not be combined as it is digitally signed and protected. The COI could also not be combined. These two documents sit independently in the folder.

Please let me know if this is sufficient for your review.

Thank you,

Hi Erica,

I am the permit writer for proposed ALPR installation application. The Permit number assigned to the application is 0424-NSV-0053. Moving forward, you and coordinate with me directly regarding the permit application. I have reviewed your EPE letter. To

process the review, the EPE will need to be revised to include the below supporting documentation:

You will need to include the supporting documentations below along with the letter:

1. Project location map and/or project vicinity map.
2. Proposed typical cross sections, layouts, profiles, and construction details related to the encroachment, as applicable.
3. Plans and supporting documentation for other alternatives considered.
4. NEPA determination, if applicable. For encroachment permit submittals, contact the District Encroachment Permits Office for more information.
5. Copies of project agreements, if applicable.
6. Other attachments related to the exception, as applicable.

The supporting documents will need to be attached to the letter as one document in PDF format.

Once completed, you can submit the EPE to me directly. If there should be any questions, please feel free to contact me.

Thanks,

Soratha Sing

Transportation Engineer

Good morning Hector

Sorry for the confusion. I
previously went back and forth
with Soratha and Jae regarding
the EPE process and
environmental requirements. I
attached a pdf of that email
thread.

Erica's submission is for the
same project for Benicia Police
Department.

Thanks,

Derek Porcella

Hector,

It is a resubmittal since we are required to prepare a policy exception. This application overrides the one Derek submitted on 1/19/24.

This application was missing the signature for the TR-100 application. Hector reached out and said it was missing a few minutes ago. I submitted this application on 4/29/24. I don't believe Derek or Melissa submitted anything to Caltrans.

Let me know if there is still confusion on this submission.

Hello,

I'm following up on this submission and was wondering if there is anything else needed from me to begin the review process.

Thank you,
